

## 6<sup>TH</sup> GRADE TRIP TO KERNAVĖ

*by Roarke, Milosz and Benedek*

The Friday of September 21<sup>st</sup> the 6<sup>th</sup> grade took a trip to Kernavė, the first capital of Lithuania. They explored the archaeological museum and observed very old artifacts from the Iron Age and Neolithic age. The students raced up and down the steep hills.

Then they went to Henrikas Orakauskas' gallery for lunch. A sculptor served them lunch which was pancakes and sausages. They went inside and looked at sculptures then fired cannon and rode on an old iron wagon that the sculptor built. Then the students went to the museum again where the guide showed arrows that were made out of wild animal bones, teeth, rock etc. The students learnt how to start fire and how to cook soup in a skin pot. Finally, sixth graders made pots out of clay.

Kernavė is really a remarkable place!
